Listening While Reading

Introduction

Many students with dyslexia listen to a text while they read it (Wood et al., 2018). Reading along may help them keep their place and understand more of what they read. This sentence is long enough to wrap onto a second line in the PDF, so that the reader has to join the lines again.

Method

Participants read twelve passages, e.g. from first-year textbooks.

1. Recruit the participants
2. Run the reading task

Group	Accuracy	Time
Dyslexic	0.81	1.2
Control	0.93	0.9

[1]The voice helped both groups.
